EVIE 2 EVERBEARER STRAWBERRY VARIETY

Evie 2 was selected in 1998 as part of the Edward Vinson Limited strawberry breeding programme. In five years of trials it has shown a number of advantages which are placing the variety as complimentary or a replacement for Everest. The variety is more vigorous than Everest and easier to grow.

Evie 2 proving to be higher yielding than Everest with a more consistent cropping pattern under heat stress. On some commercial trials it has achieved in excess of 2 kilos per plant.

The main advantages are:

- Large average fruit size with excellent fruit shape
- Extremely high yielding
- Exceptionally high percentage Class I
- Berries juicy with good flavour and pale colour
- Vigorous plants suitable for replanting into old beds
- Easy to manage and pick which reduces costs
- Some tolerance to thermo dormancy
- Tolerance to Powdery Mildew
- Consistent Cropping Variety
